

Fellowship Centers Attendance - Data Dictionary

This document defines the structure, meaning, and purpose of each field used in the Church Fellowship Centers Attendance dataset.

The dataset contains weekly aggregated attendance records at the province level across multiple regions.

Date Fields

Field Name	Data Type	Description
Date	Date	The date of the fellowship meeting (weekly record)
Month	Text	Month extracted from the Date field for reporting and grouping
Year	Numeric	Year extracted from the Date field for time-based analysis
YearMonth	Text	Combined Year and Month (e.g. 2026-01) used for sorting and trend analysis

Organizational Structure

Field Name	Data Type	Description
Region	Text	Administrative grouping of provinces within the Fellowship structure
Province	Text	Subdivision within a region containing multiple fellowship centers

Fellowship Center Activity

Field Name	Data Type	Description
TotalCells	Numeric	Total number of registered fellowship centers in a province
CellsHeld	Numeric	Number of centers that successfully held meetings during the reporting week.
CellsNotHeld	Numeric	Number of centers that did not hold meetings

Attendance Metrics

Field Name	Data Type	Description
Male	Numeric	Number of male attendees
Female	Numeric	Number of female attendees
Children	Numeric	Number of children attendees
TotalAttendance	Numeric	Total attendance (Male + Female + Children)

Evangelism Metrics

Field Name	Data Type	Description
First Timers	Numeric	Number of first-time visitors attending fellowship meetings
NewConverts	Numeric	Number of individuals who made a conversion decision during fellowship meetings.

Derived Metrics

These fields were created during analysis using DAX and Power Query.

Field Name	Description
Center Activity Rate	Percentage of centers that held meetings (CellsHeld / TotalCells)
Attendance Ratio	Ratio of attendance to expected meetings
YoY Attendance Growth	Year-over-year change in total attendance
First Timers Ratio	FirstTimers / TotalAttendance
New Converts Ratio	NewConverts / TotalAttendance
Conversion Rate(Efficiency)	NewConverts / FirstTimers

Notes on Data Preparation

- Data was aggregated at the province and weekly level.
- YearMonth was created to support chronological sorting in Power BI visuals.
- A Calendar table was used for time intelligence and trend analysis.

Summary

This dataset provides a structured view of weekly fellowship performance across regions and provinces, enabling analysis of attendance trends, operational effectiveness, demographic participation, and evangelism outcomes.
